

# Aaron TAO

Full-Stack Developer · AI Builder

0412 218 510 · [taoaaron5@gmail.com](mailto:taoaaron5@gmail.com)  
[aarontao.com](http://aarontao.com) · [GitHub](#) · [LinkedIn](#)

Melbourne, VIC · Australian PR · Full Work Rights

## PROFILE SUMMARY

Full-stack developer with a focus on production AI applications. After graduating, independently built real projects to develop industry-ready skills — resulting in DocuMind, a live RAG-powered document Q&A SaaS, and a wage management system actively used by staff at a Melbourne tutoring company. Comfortable across the full product lifecycle: requirements, Figma design, build, deployment, and security hardening. University of Melbourne MIT graduate · AWS Certified · Australian PR · Full Work Rights.

## TECHNICAL SKILLS

|          |                                                                                                  |
|----------|--------------------------------------------------------------------------------------------------|
| AI / LLM | RAG Pipelines · LangChain · OpenAI API · Claude API · Claude Code · Pinecone · Vector Embeddings |
| Frontend | React 19 · Next.js · React Native · TypeScript · Tailwind CSS · Vite                             |
| Backend  | Node.js · Express · REST APIs · JWT · SSE Streaming · AWS Lambda · DynamoDB · MongoDB            |
| DevOps   | Git · GitHub Actions · Docker · Vercel · Render · AWS · Jest · Postman · Figma                   |

## FEATURED PROJECT

**DocuMind — RAG Document Q&A SaaS** · *React 19 · Node.js · LangChain · OpenAI · Pinecone · MongoDB · JWT · Vercel + Render*

- **RAG pipeline:** PDF → RecursiveCharacterTextSplitter (1,000-char chunks, 200 overlap) → OpenAI text-embedding-3-small (1,536-dim) → Pinecone similarity search (top-5) → GPT-4o-mini → source-cited answer.
- **Streaming UX:** answers stream token-by-token via Server-Sent Events with a typewriter effect; source chunks displayed alongside every response so users can verify accuracy.
- **Multi-tenancy & security:** per-user Pinecone namespace isolation · Helmet headers · Zod input validation · bcrypt passwords · rate limiting on auth + chat routes · strict CORS in production.
- **Product features:** free plan limits (2 docs / 10 questions per week) with real-time usage bars · async background indexing with live status · multi-turn memory (last 6 exchanges).
- Live at [docu-mind-neon.vercel.app](http://docu-mind-neon.vercel.app) — full demo available at interview.

## WORK EXPERIENCE

**Full-Stack Developer (Internship)** · [Moxue Tutoring](#) · [Melbourne](#) Mar 2025

- **Owned full product lifecycle:** requirements from management, Figma UI design, full-stack build, and live deployment — wage management system now used daily by 20+ staff, replacing a paper-based process.
- **Stack:** React 19 + Vite + Tailwind · Node.js / Express 5 · MongoDB Atlas · JWT · Cloudinary · Nodemailer · Vercel + Render.
- **Quality:** 32 Jest unit tests · Helmet + CORS + rate-limiting · role-based access (teacher / admin) · automated email notifications on claim approval / rejection.

**Backend Developer (Internship)** · [Cyberlark](#) Apr 2025 – Sep 2025

- **Serverless CRM for a Brisbane real estate agency:** AWS Lambda + DynamoDB, full CRUD on client entities, recursive reminder scheduling, multi-file uploads via Cloudinary.
- **Performance:** refactored Lambda functions reducing cold-start latency ~30% and API response time ~10%; fixed 5 production bugs; automated orphan-file cleanup.

## EDUCATION · CERTIFICATIONS

**Master of Information Technology** · University of Melbourne 2021 – 2023

**Bachelor of Computer Science** · Monash University 2019 – 2021

AWS Cloud Practitioner · PMP® · ITIL® Foundation · Microsoft Office Specialist Master
